SOME NEW BOOKS.

The Lippincotts publish "Inebriety; its causes, its results, its remedy," by Dr. Franklin D. Clum. The book is peculiar in one respect. While written by a firm believer in the advantages of temperance, it entirely free from the extreme views which mare expressions of so-called Prohibition advocates generally. Indeed, Dr. Clum runs the risk of de-nunciation from that class, masmuch as he goes so far as to prescribe for habitual drunkards, advising them how and what to drink, and giving them frankly such information, physiological and practical, as may them to avoid or to postpone the wors nemes of their bad habit. Evidently the dec-olds with the old saying that "what can't be must be endured"; for, while carefully pointing out the disastrous effects of drinking, he takes comon upon the incorrigible drinkers by showing to "sober up" in the quickest and least able manner. In addition to being a tem-teacher and a drinker's manual in one, this volume also deals with the perils to which are exposed in the shape of blackmailing nspiracles and other nefarious proceedings. His was on the reformation of inebriates are characed by shrewd common-sense, and his suggestions to method appear practical. The whole book is ritten in a broad and liberal spirit, and it contains temperance and practical slaves of strong drink.

The sixth volume of the Macmillan edition of owning's poetical works contains "Dramatic rics" and "Luria." In the former some short ces have apparently been added to the original on; in the latter we note no change. There is Browning's dramatic lyrics a swing, dash, vigor nd fire alone sufficient to have made the reputation ser genius, and in their kind they have not on surpassed, even by their author. Here, too, is othing, or next to nothing, of that involution which the effect of obscurity upon myopic intellice, as encountered in his later longer poems

of negro myths (Houghton, Mifflin & Co.) from the wamp region of Georgia and the Carolinas. They are in dialect, and while differing in many particulars from the "Uncle Remus" stories, even when obviously om the same root, they are much more difficult to comprehend, because of their peculiarly outlandish

The fourth volume of the Henry Irving Shake (Scribner & Welford) contains the plays of Henry the Fifth," "The Merry Wives of Wind-Much Ado About Nothing," "As You Like It," and "Twelfth Night." Mr. Marshall announces the ression of Mr. A. Verity Wilson and Mr. Arthur rmour to the staff of the Shakespearean scholars ngaged in preparing the Irving Shakespeare. Mr.

A. Daniel writes the literary introduction to the
Merry Wives of Windson." He is cautious and conervative in his conclusions and differs in several ects from those roached by Mr. Appleton Morgan in his discussion of the same play in the "Bankside" Shakespeare. Regarding the date of the play, after marshalling the evidence, he says all the known facts lead almost inevitably to the conclusion that there was but one original for both Quarto and Folio, and that we may with something like certainty fix the date of its production on the border line between 599 and 1600." The notes to the fourth volume are generally careful and fit. We observe one error, the date of the abolition of the penalty of pressing death in England. The note says that it was inlicted as late as 1792, and not abolished by statute intil 1827. In fact, the statute doing away with the barbarous punishment was enacted in 1775, and it is certain that subsequent to that date no executions were inflicted by it. The illustrations of Gordon Broune continue to be characterized by spirit and careful attention to the details of costume, but occasionally there is a want of mechanical finish about them which should not be tolerated in a work of so much importance and designed on so high a standard

The seventeenth volume of the "Dictionary of ational Biography" (Macmillan & Co.) carries the ork from " Drant-Edridge." The concluding names galish origins, and the Duncans, as might be ex-cted, make of themselves quite an imposing array of tabilities. Among the more interesting and im-rtant biographies in this volume may be noted those yton (by A. H. Ballen) the long line of Drum-nds, winning honor in every field and raging over y avocation, from poet to archibishop, from soldier nan of science; another long line of Drurys: John yden, by the editor: the great House of the Dudleys, kes of Northumberland, Earl of Leicester, etc. No teath by the present biographer, nor does he express a decided opinion on the question of Leicester's complicity in the crime; the Duffs assert themselves numerously, as also the Dunbars and Duncans, Dundans, Dundonalds, Dunlops, etc.; Dyce (Rev. Allen) and Dver have full biographies. In the early E's, the name of Edgeworth will awaken memories hardly to satisfied by the editor's somewhat meagre sketch The Edmunds bring up early English history and

GRAIN—WHEAT—The market drags along in a decidedly listless manner, with continued absence of new features. The speculative interest has arrowed down to the lowest possible limits, and whatever changes may occur a straight of the standard or straight or standard or straight or standard or standard or standard or standard or standard or standard or sta

that a large business was being done; but such is really not the case. The movement has been almost entirely in Hops that were contracted for and bought early in the interior for October delivery, and therefore has had no direct connection with the present state of the market. The past week has been about as quiet as possible. Exporters have declined in most instances even to look at samples-giving as an excuse that they were for the mement loaded down with Hops, and wished to await the result of their late purchases and shipments before entertaining new business; while the brewers have been too much absorbed in politics and the approaching election to even talk Hops. We may therefore expect a dell market for the next fortinght. Our revised quotations reflect present values, which, as will be seen, show a slight decidine on the prices which ruled at the beginning of the month. We look upon this decline, however, as only temporary, expecially so far as it relates to choice shipping grades, every bale of which we believe will be wantd by England before the season is over at as good. If not better, prices than have yet ruled this season. The medium and lower grades, including good Hops badly picked, will drag along and be taken only in moderate quantities by our home brewers, who it seems are not willing to buy and pay the price asked for a choice shipping grade. Considerable quantities of new Pacifics have already been sent out to England. We are anxious to hear how these hops will be rated on the London market, and how they will compare with our best "States," Our prediction is that the Pacifics will meet with more than asual favor this season on account of their superb color and clean picking, especially Oregons and Washington Territories; these hops will be more than ever in favor this season, by reason of the disappointing condition of "States," a large percentage of which were spoiled by careless picking. But the question of picking has been so frequently commented upon, and its importance so urgently impres 5 05.
